

# Self-assessment sheet

## For pupils

Please complete this form when you have finished working on a problem.

Name:	Class:
Problem title:	
Did you manage to work through to a solution even though you might not have had a clear idea to start with?	
Did you need help from someone who knew what to do?	
Did you manage to explain or communicate a pattern that you saw, or idea you had, to someone else? What was it?	
If you look back on the problem, can you see other ways you could have tackled it which might, or might not, have been more effective and elegant? What were they?	
What new mathematics have you learned by doing this problem?	
Were you able to convince someone else that your solution was correct?	
Can you give an example of anything in the problem that has fired your interest enough to look at ideas not included in the question itself?
