## Mathematics (Linear) – 1380

Paper 4 (Calculator)

# **Higher Tier**

Friday 11 June 2010 – Morning

Time: 1 hour 45 minutes

#### Materials required for examination

Ruler graduated in centimetres and millimetres, protractor, compasses, pen, HB pencil, eraser, calculator. Tracing paper may be used.

#### Items included with question papers

Nil

#### **Instructions to Candidates**

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper.

Answer ALL the questions. Write your answers in the spaces provided in this question paper.

You must NOT write on the formulae page.

Anything you write on the formulae page will gain NO credit.

If you need more space to complete your answer to any question, use additional answer sheets.

#### **Information for Candidates**

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2).

There are 27 questions in this question paper. The total mark for this paper is 100.

There are 24 pages in this question paper. Any blank pages are indicated.

#### Calculators may be used.

If your calculator does not have a  $\pi$  button, take the value of  $\pi$  to be 3.142 unless the question instructs otherwise.

#### **Advice to Candidates**

Show all stages in any calculations.

Work steadily through the paper. Do not spend too long on one question.

If you cannot answer a question, leave it and attempt the next one.

Return at the end to those you have left out.

### GCSE Mathematics (Linear) 1380

Formulae: Higher Tier

You must not write on this formulae page.

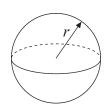

Anything you write on this formulae page will gain NO credit.

**Volume of a prism** = area of cross section  $\times$  length

Volume of sphere =  $\frac{4}{3}\pi r^3$ 

Surface area of sphere =  $4\pi r^2$ 

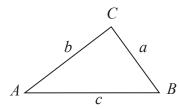

Volume of cone  $=\frac{1}{3}\pi r^2 h$ 

Curved surface area of cone =  $\pi rl$ 

In any triangle ABC

The Quadratic Equation

The solutions of  $ax^2 + bx + c = 0$ where  $a \ne 0$ , are given by

$$x = \frac{-b \pm \sqrt{(b^2 - 4ac)}}{2a}$$

Sine Rule  $\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$ 

**Cosine Rule**  $a^2 = b^2 + c^2 - 2bc \cos A$ 

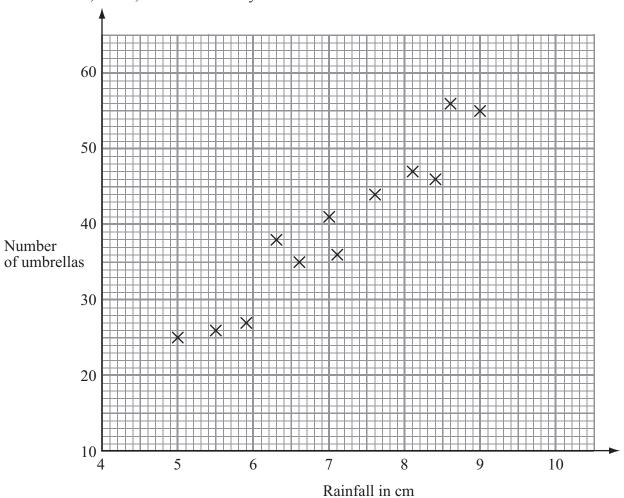

Area of triangle =  $\frac{1}{2}ab \sin C$
