2003

Mathematics test

Paper 1 Calculator not allowed

Please read this page, but do not open your booklet until your teacher tells you to start. Write your name and the name of your school in the spaces below.

First name	
Last name	
School	

Remember

- The test is 1 hour long.
- You must not use a calculator for any question in this test.
- You will need: pen, pencil, rubber, ruler, a pair of compasses, tracing paper and mirror (optional).
- Some formulae you might need are on page 2.
- This test starts with easier questions.
- Try to answer all the questions.
- Write all your answers and working on the test paper do not use any rough paper. Marks may be awarded for working.
- Check your work carefully.
- Ask your teacher if you are not sure what to do.

For marker's	Total marks	
use only	Total marks	

Instructions

Answers

This means write down your answer or show your working and write down your answer.

Calculators

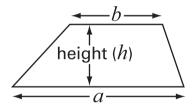

You **must not** use a calculator to answer any question in this test.

Formulae

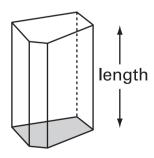

You might need to use these formulae

Trapezium

Area = $\frac{1}{2}(a+b)h$

Prism

Volume = area of cross-section × length

1. A car park shows this sign.

Car Parking 70p

Pay using any of these coins: 10p 20p 50p

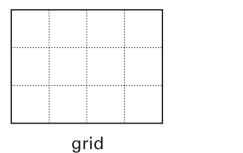

No change given

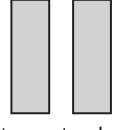

Complete the table to show all the different ways of paying exactly 70p.

Number of 10p coins	Number of 20p coins	Number of 50p coins
7	0	0

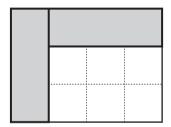

2. I have a square grid and two rectangles.

two rectangles

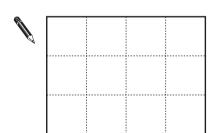

I make a pattern with the grid and the two rectangles:

The pattern has **no** lines of symmetry.

(a) Put both rectangles on the grid to make a pattern with **only one** line of symmetry.

You must **shade** the rectangles.

(b) Put both rectangles on the grid to make a pattern with rotation symmetry of order 2You must shade the rectangles.

3. Simplify these expressions.

. . . . 1 mark

. . . . 1 mark **4.** Fill in the missing numbers.

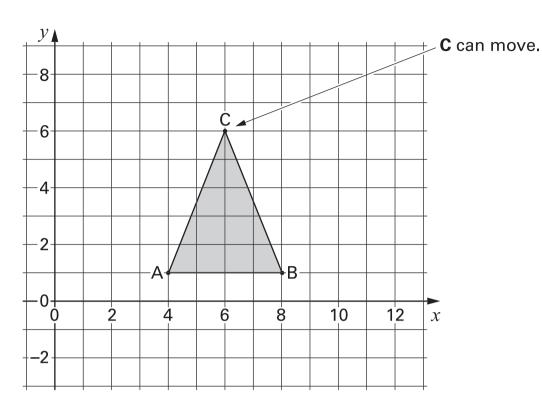

$$\frac{1}{2}$$
 of 20 = $\frac{1}{4}$ of

. . . . 1 mark

$$\frac{3}{4}$$
 of 100 = $\frac{1}{2}$ of

$$\frac{1}{3}$$
 of 60 = $\frac{2}{3}$ of

. . . . 1 mark 5. On this square grid, A and B must not move.

When C is at (6, 6), triangle ABC is **isosceles**.

(a) C moves so that triangle ABC is still isosceles.

Where could C have moved to?

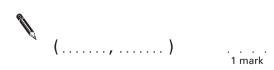

Write the coordinates of its new position.

(b) Then C moves so that triangle ABC is isosceles and right-angled.

Where could C have moved to?

Write the coordinates of its new position.

6. (a) There are four people in Sita's family. Their shoe sizes are 4, 5, 7 and 10

What is the **median** shoe size in Sita's family?

1 mark

(b) There are three people in John's family.The range of their shoe sizes is 4

Two people in the family wear shoe size 6 John's shoe size is **not 6** and it is **not 10**

What is John's shoe size?

7. Use compasses to construct a triangle that has sides 8cm, 6cm and 7cm.
Leave in your construction lines.

One side of the triangle is drawn for you.

8. (a) I pay £16.20 to travel to work each week.

I work for 45 weeks each year.

How much do I pay to travel to work each year? Show your working.

£

(b) I could buy one season ticket that would let me travel for all 45 weeks.It would cost £630

How much is that per week?

£

Solve these equations.Show your working.

$$8k - 1 = 15$$

$$2m + 5 = 10$$

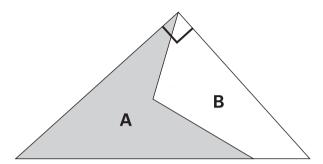

$$3t + 4 = t + 13$$

$$t = \dots$$
 2 marks

$$2(3n + 7) = 8$$

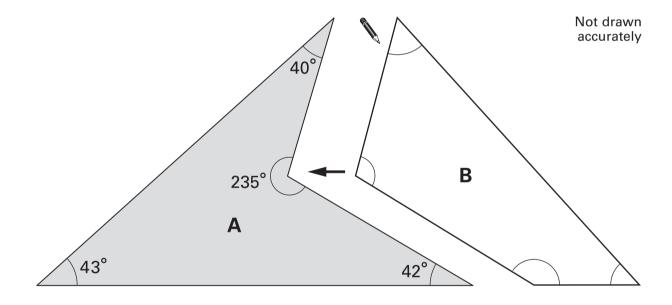

$$n = \dots$$
 1 mark

10. The drawing shows how shapes A and B fit together to make a right-angled triangle.

Work out the size of each of the angles in shape B.

Write them in the correct place in shape B below.

. 3 marks

11. (a) Add $\frac{6}{10}$ and $\frac{6}{5}$

Now use an arrow (\slashed{v}) to show the result on the number line.

(b) How many **sixths** are there in $3\frac{1}{3}$?

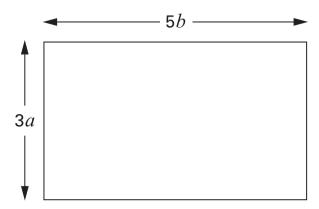

(c) Work out $3\frac{1}{3} \div \frac{5}{6}$ Show your working.

12. (a) The diagram shows a rectangle.

Its dimensions are 3a by 5b

Write **simplified expressions** for the area and the perimeter of this rectangle.

1 mark

Perimeter:

. . . 1 mark

(b) A different rectangle has area $12a^2$ and perimeter 14a What are the dimensions of this rectangle?

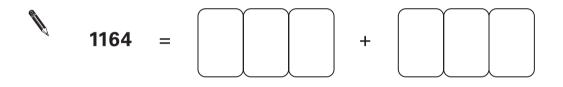

Dimensions: by

13. Here are six number cards.

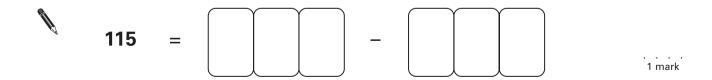

(a) Arrange these six cards to make the calculations below.The first one is done for you.

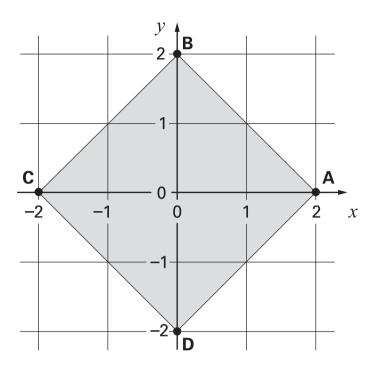

(b) Now arrange the six cards to make a difference of 115

14. The diagram shows a square drawn on a square grid.

(a) The points A, B, C and D are at the vertices of the square.

Match the correct line to each equation.

One is done for you.

Line through C and D

Line through A and C

x = 0

y = 0

Line through A and D

x + y = 2

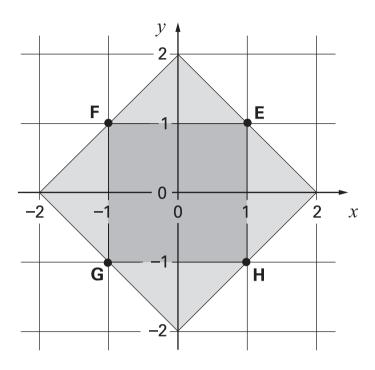

Line through B and D

x + y = -2

Line through B and C

Line through A and B

The mid-points of each side, E, F, G and H, join to make a different square.

(b) Write the equation of the straight line through **E** and **H**.

. . . . 1 mark

(c) Is y = -x the equation of the straight line through **E** and **G**?

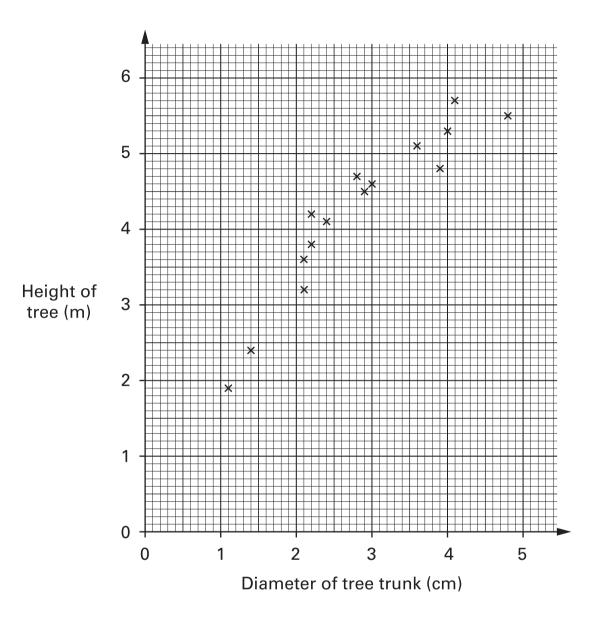

Tick (✓) Yes or No.

Yes

No

Explain how you know.

15. The scatter graph shows information about trees called poplars.

(a) What does the scatter graph show about the **relationship** between the diameter of the tree trunk and the height of the tree?

(b)	The height of a different tree is 3m. The diam Use the graph to explain why this tree is not I		
			 1 mark
(c)	Another tree is a poplar. The diameter of its tr Estimate the height of this tree.	runk is 3.2 cm.	
		m	 1 mark
(d)	Below are some statements about drawing lin on scatter graphs. For each statement, tick (\checkmark) to show whether t		True or False.
	Lines of best fit must always		
	go through the origin.	True	False
	have a positive gradient.	True	False
	join the smallest and the largest values.	True	False
	pass through every point on the graph.	True	False
			 2 marks

16. A headteacher wants to choose a pupil from year 7, 8 or 9 to appear on television.

The headteacher gives each pupil one ticket.

Then she will select the winning ticket at random.

The table shows information about the tickets used.

	Colour of the ticket	Numbers used
Year 7	red	1 to 80
Year 8	blue	1 to 75
Year 9	yellow	1 to 90

(a) What is the probability that the winning ticket will be blue?

(b) What is the probability that the winning ticket will show number 39?

(c) The headteacher selects the winning ticket at random.

She says:

'The winning ticket number is 39'.

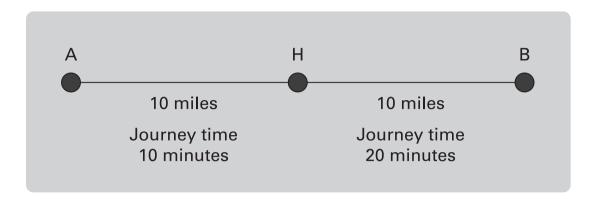

What is the probability that this winning ticket is blue?

17. The diagram shows the distance between my home, H, and two towns, A and B.

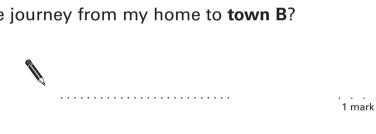

It also shows information about journey times.

(a) What is the average speed of the journey from my home to town A?

(b) What is the average speed of the journey from my home to **town B**?

(c) I drive from town A to my home and then to town B.

The journey time is 30 minutes.

What is my average speed? Show your working.

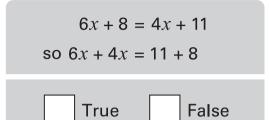

18. (a) Pupils started to solve the equation 6x + 8 = 4x + 11 in different ways. For each statement below, tick (\checkmark) True or False.

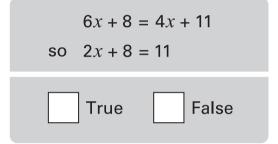

$$6x + 8 = 4x + 11$$

so $14x = 15x$

True False

$$6x + 8 = 4x + 11$$
so
$$6x = 4x + 3$$
True False

$$6x + 8 = 4x + 11$$
so
$$2x = 3$$
True False

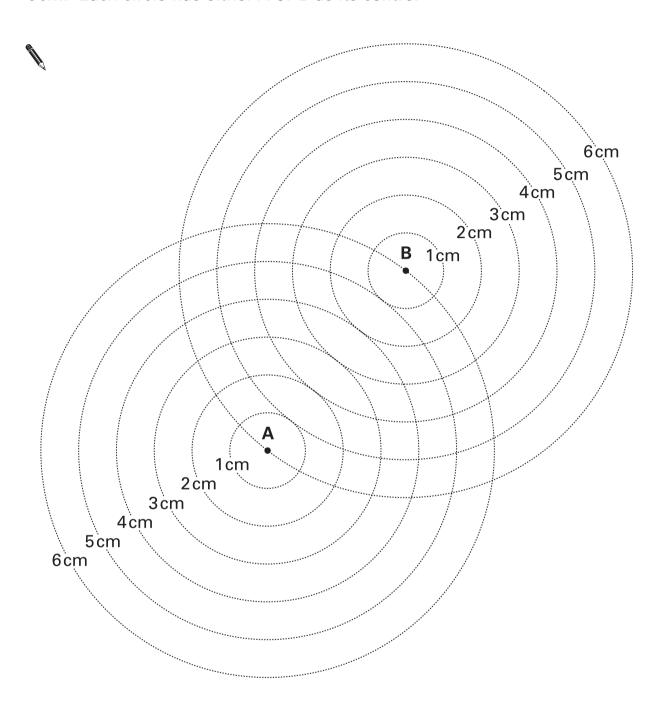

$$6x + 8 = 4x + 11$$
so
$$-3 = -2x$$
True False

(b) A different pupil used trial and improvement to solve the equation 6x + 8 = 4x + 11 Explain why trial and improvement is not a good method to use.

19. The diagram below shows two points A and B that are 6cm apart.

Around each point are six circles of radius 1cm, 2cm, 3cm, 4cm, 5cm and 6cm. Each circle has either A or B as its centre.

(a) On the diagram, mark with a cross any points that are 4cm away from A **and** 4cm away from B.

(b) Now draw the locus of **all** points that are the **same distance** from A as they are from B.

20. For each part of the question, tick (\checkmark) the statement that is true.

(a) When x is even, $(x-2)^2$ is even (

When x is even, $(x-2)^2$ is odd

Show how you know it is true for all even values of \boldsymbol{x}

. . . . 1 mark

(b) When x is even, (x-1)(x+1) is even

When x is even, (x-1)(x+1) is odd

Show how you know it is true for **all** even values of x

. . . . 1 mark
